

MULTI-TANK UPFIT

MEDIUM-DUTY TRUCK BODY FOR SEVERAL CLASS 5 CHASSIS

NO CDL. NO HAZMAT. NO PROBLEM.

The Multi-Tank Upfit is a medium-duty truck body that enables the driver to haul bulk diesel fuel without a CDL or HAZMAT endorsement.* It is well-equipped to serve fueling needs for those who work in confined or urban environments with ideal maneuverability for tight working conditions or rugged off-highway sites.

Utilizing a Class 5 chassis, the GVWR remains under the threshold for a CDL. Six or eight independent, 115 gallon tanks stand alone as DOT compliant, non-bulk, diesel fuel tanks. Tanks are only connected when a common manifold is opened at the pumping station; thereby eliminating the need for a HAZMAT endorsement. An optional electric valve manifold automatically isolates each tank when the rear door is closed to ensure DOT compliance without requiring operator intervention.

A DEF Delivery System is available in place of the front two diesel tanks. It maintains DEF purity on site and can be enhanced with a heating system that functions while in service or out of service.

*Per the Code of Federal Regulations, Title 49 (CFR49). The Multi-Tank Truck Body specifically uses independent non-bulk packaging for the transportation of combustible liquids in the U.S. Contact us for details about state regulations.
