

MTD PUMP

FUELONE
EQUIPMENT

The MTD Pump is designed for mobile use. This pump is a great solution for low-volume shops, fieldwork, general fluid transfer, and an alternative to manual hand pumps. With a 12-volt or 110-volt power supply, cable clamps, and a 100-volt power cord this pump can be stationary or mobile with the simple switch of the power supply. This allows you to take your drum or tote wherever product needs to be transferred.
