

# TP1 PUMP

**FUELONE**  
EQUIPMENT

The TP1 is a self-priming, diaphragm style pump designed for cost effective use with drums, totes and via a wall mount system. Engineered and constructed to meet the rigors of dispensing DEF from industrial containers, this pump's universal mounting bracket is designed for optimal versatility. Every TP1 will provide the customer with instant flow and filling rates above 6 GPM. This pump can be set up in minutes and used in many different DEF applications and will provide excellent results. Whether dispensing from a drum or tote, the TP1 provides the end user with excellent flow of DEF at an affordable price. All pump systems come with a convenient nozzle hook and hose hanger.
